*Astrotheology* Ted F. Peters, Martinez Hewlett, Martinez Hewlett, Joshua M. Moritz, Robert John Russell, 2018-07-12 *Astrotheology: Science and Theology Meet Extraterrestrial Life* looks at both ends of the telescope the unfathomable reaches of cosmic space and the excited stirrings within the human psyche It takes a scientist to explain what we are looking at It takes a theologian to understand who is doing the looking This book's scientific authors update readers on astrobiology's search for extraterrestrial life Theologians add to the science a theological analysis of the place of space in understanding God's creative work the prospects of sharing God's creation with extraterrestrial neighbors and the question of whether one or many incarnations are required for cosmic redemption Finally these scholars lay the foundations for an ethic of space exploration This book introduces a comprehensive astrotheology with an accompanying astroethic

**Christianity and Extraterrestrials?** Marie George,2005 Does ETI existence spell the death of Christianity The increasingly popular answer is yes Marie George argues to the contrary that Christian belief is compatible with ETI existence by examining Roman Catholic teaching and Scripture She then makes a case that while Christian belief does not exclude ETI existence it does render it improbable George goes on to expose the faulty reasoning behind the common opinion that science indicates that the universe surely contains other intelligent life forms She closes with speculations on what the Catholic Church might eventually say about ETIs Central to her analysis is the cosmic role of Christ I appreciate arguments like those in Christianity and Extraterrestrials laid out carefully and investigated thoroughly If more writers proceeded with Dr George s care and courtesy there would be new hope for peace in the world John L Barger Ph D Publisher Sophia Institute Press Although some of Dr George s claims are controversial she is clearly an author seeking the truth and open to opposing arguments Moreover she has sought out the best sources and used them wisely in short an admirable scholarly presentation Michael J Crowe Cavanaugh Professor Emeritus University of Notre Dame and author of The Extraterrestrial Life Debate 1750 1900

**E.T. Talk** Fernando J. Ballesteros,2010-08-12 For a long time I have been giving scientific lectures in different countries and on diverse topics generally related to astronomy and to my work at the Arecibo Observatory No matter which parti lar topic I am talking about the same question always comes up Have we had any contact at Arecibo with them My negative answer does not satisfy anyone In fact the answer either confirms their suspicions that there is a conspiracy afoot by higher autho ties not to release information or their intentions to deceive the general public The reasons for the deception have to do with the idea that as in the movie Contact the received messages contain important and useful information that will bring great advantage to whoever gets it Many of us want to believe that extraterrestrial creatures can talk to us that perhaps they are even living among us as UFO fans believe It would be fascinating if it were true a more than extra dinary discovery the answer to an eternal question There is p sibly a deep psychological motive in this desire to know if we are alone in this huge universe and the need to believe in something beyond our limited world in space and time There is no doubt then that this topic brings with it many scientific and philosophical discussions as well as speculations that on many occasions fall into pure pseudoscience because of the lack of a reference framework

*Boomers* Helen Andrews,2021-01-12 Baby Boomers and I confess I am one prepare to squirm and shake your increasingly arthritic little fists For here comes essayist Helen Andrews Terry Castle With two recessions and a botched pandemic under their belt the Boomers are their children s favorite punching bag But is the hatred justified Is the destruction left in their wake their fault or simply the luck of the generational draw In *Boomers* essayist Helen Andrews addresses the Boomer legacy with scrupulous fairness and biting wit Following the model of Lytton Strachey s *Eminent Victorians* she profiles six of the Boomers brightest and best She shows how Steve Jobs tried to liberate everyone s inner rebel but unleashed our stultifying digital world of social media and the gig economy How Aaron Sorkin played pied piper to a generation of idealistic wonks How Camille Paglia corrupted academia while trying to save it How Jeffrey Sachs Al Sharpton and Sonya Sotomayor wanted to empower the oppressed but ended up empowering new oppressors Ranging far beyond the usual Beatles and Bill Clinton clich s Andrews shows how these six Boomers effect on the world has been tragically and often ironically contrary to their intentions She reveals the essence of Boomerness they tried to liberate us and instead of freedom they left behind chaos
